## INSTALLATION INSTRUCTIONS

The following helpful hints apply to the installation of Venetian Circles, and are to be used with the Paver Installation Instructions found in the How-to Section of this website.

1. Circle packs should always be installed starting from the inside (centre stone) and working outwards.
2. When spreading bedding sand for the centre of the circle, only spread sand over a large enough area to allow placement of stones without disturbing material. Spread additional bedding sand as circle progresses outwards.
3. When circle is completed, lay the remaining area of project as per normal, taking extra care around circle to ensure lines are maintained. Leave cutting of final filler pieces directly around perimeter of circle to the end.
4. To prevent stones from spreading, do not compact circle into bedding sand until previous step is completed.

## CIRCLE DESIGN CHART

The Venetian Circle bundle can make up to one 2.51 m (8'3") diameter circle or up to two 1.55 m (5'1") diameter circles.
